

Rob Tebb is a highly skilled machinist and entrepreneur of Métis descent who has made a name for himself in the manufacturing industry. Rob's career as a machinist spans decades, throughout which he has gained a wealth of experience and knowledge, as well as built a reputation as problem solver and solutions provider. Rob began as an apprentice machinist, eventually working his way up to journeyman, and ultimately becoming General Manager of the machine shop at which he worked for many years. In 2013, Rob and his wife Katherine founded Xtended Hydraulics & Machine, an Indigenous-owned and operated machine shop based out of Emerald Park, Saskatchewan.

As Co-Founder and CEO of Xtended, Rob brings his extensive experience and expertise in machining to the forefront, helping to build and lead a team of skilled machinists, millwrights, welders, and others that design and manufacture products and offer services for a variety of industries, including the mining, oil and gas, agriculture, and construction industries, just to name a few. Rob instills a focus on providing quality products and solving problems by providing solutions to client problems, rather than band aid fixes.

In addition to his knowledge and skills as a machinist, Rob is also a proud member of the Métis community and is committed to supporting Indigenous businesses and causes. Through Xtended, Rob strives to provide meaningful employment and career opportunities to Indigenous peoples, and actively contributes to the economic growth and development of Indigenous communities and businesses.
